

Linoleum Panels

Linoleum Panels

Our acoustic panels with a linoleum surface allow you to create a unique and personal touch in your interior design. With 21 different color tones and 2 different slat widths, you can easily find a product that meets your specific needs. Linoleum is an exclusive and durable natural material that offers a modern and sophisticated look, and is a strong alternative to more traditional wood types.

In addition to the stylish design, the panels have the same excellent acoustic properties as our other products, meaning they effectively break and absorb sound waves, reducing noise levels by up to 50%. This creates a more pleasant and quiet environment, both at home and in the workplace. With their environmentally friendly Nordic Swan Ecolabel certification and the use of recycled materials in production, our linoleum panels are not only an aesthetic addition to your home but also a responsible choice that combines design and function.

With our Linoleum Panels, you get:

Creative Freedom

Linoleum Panels give you endless possibilities to create your own unique expression and design.

Exclusive Design

An exclusive look, produced with a focus on aesthetics and elegance.

Danish Craftsmanship

Produced in Central Jutland, ensuring high quality standards through Danish design and production.

The Responsible Choice

At the end of their life cycle, the panels can be recycled, emphasizing our commitment to responsible design and environmental awareness.

Features:

- **Local production**
All panels are produced in Denmark.
- **Attractive square meter price**
Competitive price per square meter.
- **Quick assembly**
Easy and quick installation.
- **Minimal use of tools**
Requires only a few tools for installation and adjustment.
- **Lightweight construction**
The panels have a low weight, which simplifies handling.
- **Varied surface options**
Options for different veneer surfaces and core colors.
- **Durable natural material**
Linoleum is made from natural materials, with the main ingredient being linseed oil, extracted from flax seeds.
- **Environmentally certified materials**
Linoleum Panels are certified with the Nordic Swan Ecolabel.
- **Cleaning**
Our panels can easily be cleaned with a wrung-out damp cloth.

Nordic Swan Ecolabel certified.

Sorted as recycled wood.

 Indoor climate test: Danish Technological Institute
 Acoustic test: Danish Technological Institute

Installation Guide

Method 1

- Directly on the wall

Mounting adhesive: Apply the adhesive to the panel and place it against the wall. Ensure it is firmly pressed.

Screws: Screw the panel through the felt and into the wall. We recommend using 4 screws per panel. Remember to use wall plugs if your wall type requires it.

Method 2

- On a batten

For optimal sound absorption, set up a batten with 45 mm (1.77 in) battens on your wall. We recommend a spacing of 600 mm (23.62 in) between your battens. Insert mineral wool between the battens. Screw the panel onto the battens through the felt.

Panel adaptation:

If you need to customize the panels in width or length, we recommend using a plunge saw or circular saw for cutting.

Alternative mounting:

Nail gun diving

FOG & VENØ A/S

Fog & Venø is a leading Danish manufacturer of acoustic and decorative panels with and without acoustic properties. These products are designed and manufactured with a focus on Danish craftsmanship and a constant pursuit of high quality.

The panels are suitable for installation on both walls and ceilings.

Fog & Venø has a strategic partnership with world-leading suppliers of materials such as wood veneer, linoleum, foil, and laminate, ensuring that all Fog & Venø products maintain a high standard and a wide range of options. This means that there is constantly reverberation in the room, and this is where our acoustic panels make a big difference.

Our Danish-produced acoustic panels break the sound and absorb the sound wave, so it dies out when it hits the panels. This means that the sound wave is eliminated and the reverberation time is shortened, which will improve the indoor climate and the feeling of well-being in the room, whether it is private, commercial, or public buildings we are talking about.
